Rotary

MY ROTARY EMBLEM

It grants me a great and honourable privilege. Anywhere I go, each wearer of this noble badge is my friend. Into their surroundings I may go with assurance of a warm welcome. It requires of me that I think in harmony with the principles of Rotary, the highest in the land and broad enough to encompass every daily activity. It requires that I dispel the prejudices of race, creed and political views. I must be patient, liberal, just and upright, all to a noticeable degree. It reminds me that it moves in a realm to itself. It is looked upon with unimpaired respect wherever it appears. Its wearer enjoys a distinction that only the violation of its principles can mar. All this speculation makes me wonder if I deserve to wear it. Am I equal to all it implies?

END TEXTILE WASTE

HOW CLOTHING IMPACTS CLIMATE CHANGE:

Clothes cause 35% of the microplastics in our environment. We need more awareness of the impact of synthetic clothes and what we can do about it.

WASTE CREATED BY TEXTILE:

- ◆ Global textile fibre production has almost doubled from 58 million tonnes in 2000 to 109 million tonnes in 2020, and projected to grow to 145 million tonnes by 2030.
- ◆ 50% clothes are synthetic and most are almost 'single use'.
- ◆ Less than 50% used clothes are collected for reuse and recycling, only 1% is recycled to new clothes.

IMPACT OF TEXTILE ON OUR ENVIRONMENT

OVERCONSUMPTION OF NATURAL RESOURCES:

- ◆ ***We have an over-consumption of natural resources:*** an estimated 2,700 litres of fresh water is required to make 1 T-shirt, the same as one persons drinking needs for 2.5 year.
- ◆ ***Water pollution:*** Textile production is estimated to be responsible for 20% responsible of clean water pollution.
- ◆ ***Microplastics:*** A single laundry of polyester clothes can discharge 700,000 Micro Plastic fibres. More than half a Million Tonnes of Micro Plastics finish on the bottom of the ocean.
- ◆ ***Health and biodiversity:*** Garment production and the microplastics in the air, soil and water have a devastating impact on the health of local People, Animals and Ecosystem.
- ◆ ***Greenhouse gas emissions:*** The fashion industry is estimated to be responsible for 10% of Global Gas Emissions, more than International Flights and Maritime shipping combined.

MICROPLASTICS

- ◆ 35% microplastics come from clothes
- ◆ 28% from car tires
- ◆ 26% from city dust (including cigarette filters and personal care products) Source: <https://www.plasticsoupfoundation.org/en/plastic-facts-and-figures/>

**The lighter
side...**

"How was your golf game, dear?" asked Jack's wife.

"Well, I was hitting pretty well, but my eyesight's gotten so bad I couldn't see where the ball went."

"But you're seventy-five years old, Jack!" admonished his wife, "Why don't you take my brother Scott along?"

"But he's eighty-five and doesn't even play golf anymore," protested Jack.

"But he's got perfect eyesight. He could watch your ball," Tracy pointed out.

The next day Jack teed off with Scott looking on. Jack swung, and the ball disappeared down the middle of the fairway.

"Do you see it?" asked Jack.

"Yup," Scott answered.

"Well, where is it?" yelled Jack, peering off into the distance.

"I forgot."
